

HEAVY DUTY CONTACT PRESSURE GAUGES WITH BOURDON TUBE AND MAGNETIC SNAP-ACTION CONTACTS OR INDUCTIVE ALARM CONTACTS acc. to EN 837-1

Diameter 100
Connection position radial bottom
or eccentric back
with or without damping

Contact pressure gauges with electrical alarm contacts are suitable for controlling or regulating process sequences. The contacts open or close electrical circuits in relation to the position of the pointer on the pressure gauge. Suitable for media, do not attack the copper alloys, are not highly viscous and not to the crystallize tend.
